MedTech Pathways Cohort 2026

May 2026

Two-week time audit

Week 1 — Baseline (pre-CariSurg)

	Full-time work	47.5 hrs
	Sleep	49 hrs
	Rest / meals	10.5 hrs
	Misc buffer	10.5 hrs
	Unstructured evenings	~17.5 hrs
	CariSurg	0 hrs

Week 2 — Week 0 (daily submissions)

	Full-time work	47.5 hrs
	Sleep	49 hrs
	Rest / meals	10.5 hrs
	Misc buffer (gym etc.)	10.5 hrs
	Unstructured	~5 hrs
	CariSurg	~12.5 hrs

Week 0 proved the evening schedule is sustainable under daily submission pressure.

Proposed weekly schedule — Weeks 1–12

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
6:30–8:00	Morning / commute	Morning / commute	Morning / commute	Morning / commute	Morning / commute	CariSurg deep work	CariSurg deep work

20.5 hrs

Weekly total
✓ target met

Buffer overflow: if misc buffer (8:30–10) is used for CariSurg on 2 weekdays → ~23 hrs total

A — urgent + important

7:00–8:30 PM weekday CariSurg block. Non-negotiable. The Sunday 21:00 UTC interim deadline acts as a clinical escalation trigger — missing it has direct consequences.

B — important, not urgent

10:00–11:00 PM secondary block + weekend deep work. Builds the long-term portfolio. Can absorb one missed session without cascading failure.

C — nice-to-have

Misc buffer (8:30–10 PM): gym, errands, social. First to be converted to CariSurg overflow when the week falls behind schedule.

Why this schedule works

01

Built around work, not against it

The 7:00 PM block follows a 90-min rest window after work. CariSurg work started well rested.

02

Weekend hours are the highest quality available

Previously unstructured, Saturday and Sunday mornings are now for deep work. The best time window in the week for major productivity.

03

Degrades gracefully under pressure

A-blocks survive a hard week. B-blocks compress. C-blocks absorb the impact. The schedule holds even on bad days.

04

Already stress-tested

Week 0 proved daily submissions are achievable within this structure. The proposed schedule formalises what already worked.
